To Whom It May Concern:

My name is Rene Alvarez, the IT Infrastructure Manager at Tetra Technologies. I have 20+ years of experience working in the field of Information Technology and have witnessed many young professionals come and go. However, Jordan Levinson is one individual with whom I have worked who uniquely stands out. He possesses a tremendous skill set, not to mention an exceptional mindset.

I am pleased to write this letter of recommendation on behalf of Jordan Levinson, who has served as an IT Sr. Network Engineer at Tetra Technologies for the past year and a half. During this time, I have had the privilege of working closely with Jordan. I have consistently been impressed by his exceptional skills, dedication, and contributions to our organization.

Jordan has excelled in the position of Sr. Network Engineer at Tetra. He has demonstrated his ability to adapt quickly to an environment where he was given limited time to learn and was tasked with addressing issues under tight time constraints. He has shown his capacity to learn swiftly, improving our environment while simultaneously building a relationship with the business—a relationship that the IT department had previously struggled to establish at Tetra. As a team member, I've observed how he collaborates with others, stimulating discussions by introducing ideas and potential solutions. He has also been an excellent mentor to other members of the IT infrastructure team. I have collaborated directly with Jordan on several projects, and he excels at managing projects, from handling vendor/partner relationships and costs to coordinating across different departments/groups. He recently showcased this by refreshing our network architecture/hardware, securing several of our most critical remote sites, and in the process, saving the company several thousands of dollars in recurring costs.

Jordan is a pleasure to work with and is valued not just by myself but by his peers, who frequently rely on him to get the job done.

I am confident that Jordan would be an excellent fit for your company. He will not only bring the skills and experiences you're seeking in an applicant, but he will also quickly become a valuable asset, contributing to your company's growth and prosperity.

If you require more information or specific examples, please do not hesitate to contact me. While a recommendation letter might only offer a snapshot of his talents and achievements, I would be happy to provide further details about my time working with him.

Sincerely,

Rene Alvarez

Tetra Technologies, IT Infrastructure Manager
